Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Saroj. Saroj discloses a method of preparing rice. This method of preparing rice is well known in the art, the prepared rice commonly known as "fried rice." The method comprises the steps of boiling rice until nearly cooked through, draining and cooling the rice, frying with vegetables in oil, and then allowing cooking to finish with seasonings or sauces. The steps of washing and soaking rice are inherent steps in the preparation of rice.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Saroj. The teaching of Saroj has been discussed above. Saroj has not disclosed those limitations presented in the instant claims 2 and 3. Firstly, in the instant claim 2, regarding the thickness of the rice grains, it is well known in the art that rice thickness is typically in the range of 1-2 mm. This limitation defines all rice, and is not an exclusive property of the rice product prepared according to the instant claim 1.

Regarding the moisture content and the dispersion area of the rice product, one of ordinary skill in the art would note that any rice product prepared by the method of instant claim 1 or any method anticipating or being anticipatory of the instant claim 1 would produce a rice product with identical properties. Absent any clear and convincing evidence and/or arguments to the contrary, the limitations of the instant claims 2 and 3 are applied to any rice product, such as a rice product prepared by the method of Saroj discussed, above would possess the properties of the rice product claimed in the instant claims 2 and 3. Given that the office does not possess the facilities to test the rice products prepared by the method of Saroj and the method of the instant claim 1, the burden shifts to the applicant to demonstrate a patentable distinction of the limiting properties claimed in the instant claims 2 and 3.
